PROFESSIONAL SUMMARY

BCA student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Python, machine learning, and full-stack web development. Skilled in building practical projects involving data analysis, NLP, REST APIs, and database integration. Currently exploring AWS and cloud computing, with a strong interest in AI/ML engineering and backend development.

EDUCATION

- **Christ Academy Institute For Advanced Studies** — Bangalore - India
  BCA AI|ML - Computer Science and Engineering: CGPA: 8 — July 2025 - July 2028[Ongoing]
- **Christ Academy Junior College** — Bangalore - India
  PCM and Computer Science: Percentage: 93% — July 2023 - April 2025
- **MSB Educational Institute** — Bangalore - India
  SSLC: Percentage: 92.3% — March 2023

SKILLS SUMMARY

Languages:	Python, JavaScript, SQL, HTML, CSS
Frameworks & Libraries:	React.js, Node.js, Express.js, Tailwind CSS, Vite
AI/ML & Data Science:	NumPy, Pandas, Scikit-learn, Matplotlib, Machine Learning, Data Analysis, NLP
Tools & Platforms:	Git, GitHub, Docker, MongoDB, PostgreSQL, Vercel, Render, AWS(Learning), Ollama

EXPERIENCE

- **InAmigos Foundation** — October 2026 - Remote
  Web Developer

  Internship Overview: Completed a two-week internship focused on designing and developing web applications. Gained practical exposure to web development workflows while learning about NGO operations, social initiatives, and the role of technology in supporting nonprofit organizations.

PROJECTS

Jarvis — Local AI Voice Assistant: Developing a voice-controlled AI assistant that integrates a locally running Gemma language model with a FastAPI backend and a React interface, enabling AI-powered interactions while keeping model inference local.
Technologies: Python, FastAPI, React.js, Ollama, Gemma, SQLite, Tailwind CSS

Fit Cloths — AI-Powered Custom Tailoring Platform: Developed an AI-powered tailoring platform combining photo-based body measurement estimation with a RAG-based styling assistant for personalized outfit recommendations.
Technologies: Python, Flask, React.js, Express.js, Ollama (Gemma)

PaperPilot — OCR-Based PDF Processing System: Built a Dockerized PDF processing tool that converts scanned documents into searchable PDFs and supports PDF compression and optimization.
Technologies: Python, OCRmyPDF, Ghostscript, Docker

CERTIFICATIONS

- **Frontend Development —** Meta (Coursera): Completed training in modern frontend development and web fundamentals.
- **Backend Development —** IBM (Coursera): Learned backend application development using Node.js and MongoDB.
- **Database Management Essentials —** University of Colorado (Coursera): Covered SQL, relational database design, and data modeling.
- **Data Science Using Python —** Aligarh University: Learned Python-based data analysis and data science fundamentals.
- **AI & ML Specialization —** TechByHeart: Ongoing training in artificial intelligence and machine learning alongside BCA studies.
